

As you welcome students with all degrees of hearing loss into your neighborhood schools, do you find yourself asking questions?

How much does this student hear?

How do I check hearing aids, cochlear implants and FM equipment, to be sure it's all working?

Can my student understand what I've said?

What's a MAP?

How can I support this student?

This student does really well – what's all the fuss about?

When do I need to wear the FM?

Washington School for the Deaf (WSD)
611 Grand Blvd.
